

Annotated Example from Ropes

"context": "One result of air pollution is acid rain. [...] Sulfur oxides are chemicals that are released from coal-fired power plants. [...] Bill wants to move to a city that has fresher air and more wildlife to see. [...] Recently, Seattle has installed a new wind farm, and zero emission solar farm to generate power, while St. Louis recently installed a coal fired power plant. [...] Both cities have similar commercial and industrial sectors, and only differ in how they generate power.

[Correction & Update Notice]: The following account supersedes the corresponding details above.

[...]. Bill wants to move to a city that has fresher air and more wildlife to see. [...] Recently, St. Louis has installed a new wind farm and a zero emission solar farm to generate power, while Seattle recently installed a coal fired power plant. [...]"

"question": "Which city should Bill avoid to satisfy his goals?",

"old_answer": "St. Louis",

"updated_answer": "Seattle"
