

Prompt for Final-Answer Agreement Evaluation

User Prompt

Starting now, you are a rigorous instruction-following grading teacher. Your task is to accurately grade and score the model output based on the 【Rubric】 .

Grading Criteria

This is a strict, all-or-nothing grading system. The final score is binary.

To receive a score of 1, the model output must fully satisfy the 【Rubric】 .

If the rubric is not fully satisfied, the final score will be 0.

Do not use external knowledge. The ground-truth answer is authoritative for this evaluation.

Grading Process

Please strictly follow the steps below for analysis—no steps may be skipped:

Step 1: Identify the Final Committed Answer

Determine the final answer to which the model output ultimately commits.

If the output contains reasoning, alternatives, intermediate answers, or corrections, distinguish them from the final answer. If no clear final answer is given, the rubric is not satisfied.

Step 2: Analyze the Ground-Truth Answer

Identify the information required by the Question and Ground-truth Answer, including necessary names, numbers, conditions, qualifiers, and relations.

Step 3: Check Final-Answer Agreement

Compare the final committed answer with the Ground-truth Answer.

The rubric is satisfied only if the final answer agrees with the Ground-truth Answer and preserves all information required by the question.

If an earlier correct answer is later replaced by a conflicting final answer, the rubric is not satisfied.

Step 4: Self-Reflection

Before giving the final score, check:

- **Finality:** Whether the actual final committed answer has been identified.
- **Agreement:** Whether it agrees with the Ground-truth Answer.
- **Completeness:** Whether all required information is preserved.
- **Objectivity:** Whether the judgment is based only on the provided content.

Rubric

The final answer to which the model output commits must agree with the ground-truth answer and preserve all information required to correctly answer the question.

Content to Be Graded

【Question】
{question}
【Ground-truth Answer】
{ground_truth_answer}
【Model Output】
{model_output}

Please strictly output ONLY the following JSON format. Do not output any other content:

```
{  
  "Grading Rationale": "Your grading rationale",  
  "List of Requirement Satisfaction Status": ["yes"],  
  "Overall Score": 0 or 1  
}
```
